Such a great job! Choices felt really natural. If I had any feedback, it would just be that I'd love to see a little more movement in your body so it doesn't feel quite so still... but that was so great, its really the only thing I felt I could add!

Wow! Very good range for someone so young. Facial expressions were great, knew her lines, and delivered. That was incredibly surprising to watch. Future star.

Hi Emily, love your smile! Your face is very expressive but not overly which is great. I liked your genuine sense of curiosity & concern in this scene, and I loved the changes of your energy, so fun & very well done. You have a massive amount of potential & talent so please keep it up! Try not to rush through the scene and stay as grounded as possible so you can really process & react authentically. I hope to see you again one day :)

You are adorable! Slow down on your slate. Watch your pacing sometimes the pause before the next line is too long. I want to see you actively listening to your scene partner, take in the information and then just respond naturally.
